

ITF Theme Day

'Subsea Intervention (including wells & pipelines)'

Wednesday 28th October 2009 – Hilton Houston Post Oak Hotel, Houston, TX

Agenda

- 07.30-08.00 **Coffee and Registration**
- 08.00-08.40 **Preliminaries and Welcome** by ITF who will explain the objectives of the day and how the ITF process works
- 08.40-09.40 **Invited Speakers** will provide scene setting indication of the challenges which the industry faces:
Art Schroeder, DeepStar/RPSEA will provide a brief overview of the current challenges ahead and recent work which is ongoing in this theme.
- 09.40-10.00 *Coffee Break*
- 10.00-12.00 **Facilitated Workshop Session 1:**
A professional facilitator will guide discussions to define in more detail what issues and challenges face the industry
- 12.00-13.00 *Networking Lunch*
- 13.00-14.00 **Facilitated Workshop Session 2:**
(Continued)
- 14.00-15.00 **Feedback**
With closing comments and exit poll

The oil and gas industry is continually facing new challenges in reserve replacement and improved recovery, we look to optimise our efforts with new production techniques and cost effective subsea interventions. Subsea intervention is now a viable option for many field developments and in many deepwater instances is the only option.

We not only need to embrace the challenges brought about as we move into challenging areas of development but we also need to improve our cost efficiency on existing developments by continuously looking at how we do things. By bringing together a number of the industry's major operator and service companies, this theme day is set to discuss and leverage understanding of the technology targets that exist within the focus of subsea intervention. Our discussion are expected to cover low cost methods of well intervention; intervention methods for high productivity; intervention in ultra-deep water; new installation techniques; automated systems; and the state of the art of remote and autonomous technologies.

This gathering of experts will allow the industry to identify the main challenges in this area and will focus our thinking in the process of finding solutions.

The output from this workshop will lead to ITF issuing a global 'Call for Proposals', with potentially up to 100% funding available for successful applications.

'Subsea Intervention (including wells & pipelines)

Wednesday 28th October 2009 – Houston, TX

Who Should Attend?

The theme day is a limited attendance meeting and an opportunity for experts from operators, major service companies, SMEs, and research and academic organisations to sample the ITF process at work and to be involved in the process which encourages interaction between industry end users and the technology development community both locally and globally.

Our aim for the day is to engage with the industry to define the challenges and to use the ITF process to seek out innovative solutions to the benefit of the industry

The output of the day will identify technology needs and ITF will issue a global 'Call for Proposals', which can lead to up to 100% funding for successful applicants.

About ITF

ITF is an internationally recognised champion for technology innovation within the oil and gas industry, acting as a conduit between technology innovators and the industry. ITF is a 'not for profit' organisation owned by major global operators and service companies.

ITF's key objectives are to identify technology needs, foster innovation, and facilitate the development and implementation of new technologies.

The ITF industry led and demand driven process has been instrumental in the deployment of many key technologies into the oil and gas provinces around the world.

Registration Details

Delegate Fees:

ITF Members

No charge

ITF Members are required to register here:

<http://www.oil-itf.com/payment/subsea-intervention.html>

Non-members

£120.00 (zero VAT)

Exhibition Space:

Pop-up

£250.00 (zero VAT) includes one delegate space

For non-members to register or to reserve an exhibition place, please pay here:

<http://www.oil-itf.com/payment/subsea-intervention.html>

Please contact Ashleigh Martin on +44 (0)1224 853409 or at a.martin@oil-itf.com for further information on registering.

ITF is seeking delegates who will make a valuable contribution to our discussions, hence ITF reserve the right to decline registration to any delegate application. The registration process will seek an indication of your relevant experience.

Cancellation Policy:

Cancellations may be submitted no later than one week before the event, with a 50% refund of booking fees. There is no refund for cancellations received after this date. Substitution of delegates can be made at any time.

ITF reserves the right to cancel the seminar due to unforeseen circumstances. ITF is not liable for any expenses incurred by the delegate.
