

benefits of membership

- **route to best available technology**

As an honest broker ITF offers its members access to a global oil & gas development community. Through a low risk, high reward industry led and collaborative process ITF gives members access and cross fertilisation with technologies across industry.

- **technology implementation**

ITF's focus is to deliver joint industry projects to its members through concept, development and field trials, to early stage adoption and the complete project managed route to market.

- **standard JIP agreements**

Members benefit greatly from industry developed contractual agreements that provide an easy passage to establish Joint Industry Projects.

- **close working relationship**

Members are offered a trusted partnership such that they are able to feel that ITF is an extension of their technology department.

- **professional development – making it happen**

On behalf of its members ITF provides links to industry expertise through engagement in pan-industry forums that identify the focused technical challenges and solutions.

- **supply chain engagement**

By engaging across the whole spectrum of the supply chain ITF provides improved competitiveness.

- **members own and steer ITF goals and objectives**

Membership brings the opportunity to participate at a high level with end users and developers to define ITF goals and objectives.
